

ARYA DHEFFAN SHEVCHENKO

+6282287855632 · ARYACHENKKO46@GMAIL.COM · [LINKEDIN](#) · [PORTFOLIO](#) · JAKARTA SELATAN, DKI JAKARTA

PERSONAL BACKGROUND

An informatics graduate from Diponegoro University with a strong interest in machine Learning and AI, experienced in building ML models, data-driven applications, and full-stack systems. Hands-on experience in Python, TensorFlow, and cloud-based development with strong analytical and problem-solving skills. Beyond technical expertise, I am an ambitious learner and active content writer, synthesizing complex topics such as history and philosophy to sharpen my critical thinking and communication skills. I'm now looking to bring all of that into an industry where AI work is real, the problems are messy, and the solutions have to actually hold up.

EDUCATION

Bootcamp Offline - Non Formal Education

April 2026 - Present

Dibimbing - Data Analytics

- Completing an intensive 3-month data analytics program focused on industry-relevant coursework, including data warehousing, visualization, and exploratory analysis.
- Applying Python, SQL, Power BI, and Tableau to hands-on projects simulating real business problems.
- Built data-related projects, including data cleaning, visualization, dashboarding, A/B Testing, and data modeling. In total, 8 projects. [Click this to see the projects.](#)
- Undergoing a structured internship placement post-program as part of the curriculum.

Bachelor Degree

2021-2025

Diponegoro University - Informatics - 3.79

- Specialized core coursework in Machine Learning, Natural Language Processing, and Database Systems, building a strong foundation in AI and data-driven problem solving.
- Built an information system for the education system at Diponegoro University during my "Software Development Project" coursework.
- Developed a deepfake detection system as a final project, classifying AI-generated vs. real videos using Generative Adversarial Networks (GANs).

PROFESSIONAL EXPERIENCES

Informatics Universitas Diponegoro | Practicum Assistant

January 2024 - December 2024

- Mentored 50+ students in understanding core ML and OOP concepts.
- Strengthened technical expertise in machine learning algorithms and object-oriented programming through direct teaching, debugging, and real-time problem analysis.

Specific Skills: Machine Learning, Data Science

PT Pertamina Hulu Rokan - Minas, Riau | AI Engineer Intern

January 2024 - February 2024

- Developed a web-based predictive application that can predict crude oil production.
- Engineered a machine learning model that achieved 93% accuracy in predicting inferred production.
- Collaborated on end-to-end by integrating data science and full-stack development.

Specific Skills: Machine Learning, Data Science, Full-Stack Developer

ORGANIZATION EXPERIENCES

Ikatan Keluarga Mahasiswa Riau | Human Resource Development

August 2023 - August 2024

- Led human resource development initiatives for the division, coordinating member activities and internal programs across the organization.
- Organized and executed Undip Visits Riau, a university promotion program targeting prospective students in Riau province.

Himpunan Mahasiswa Informatika | Treasury & Editor

February 2022 - December 2023

- Managed the division's operational budget, overseeing financial planning and expense tracking for all work programs in the Art & Sports division.
- Produced and edited division content, ensuring consistent documentation and communication across programs.

Specific Skills: Communication, Teamwork, Editing

PROFESSIONAL DEVELOPMENT PROGRAM

Analyzing Key-Factor of Winning in Football Matches and Predicting the Classement of World Cup 2026 | Bootcamp Final Project

July 2026

- Developed a CatBoost-based machine learning model to predict football match outcomes using match performance statistics.
- Conducted exploratory data analysis and statistical hypothesis testing to identify significant factors influencing match results.
- Built an interactive Power BI dashboard presenting key insights, feature importance, and World Cup 2026 tournament predictions.

Medium | Article

- Recently, I have read many books and actively shared key insights from them.
- I share knowledge across various fields, including philosophy, history, politics, and culture.
- This practice has strengthened my critical thinking, problem-solving, debate skills, and creativity.
- Developed the ability to synthesize complex ideas and communicate them clearly to a broad audience.

Specific Skills: Critical Thinking, Literature

Google Inc | Google Cloud Skills

January 2026 - February 2026

- Completed various machine learning and AI training programs, including prompt engineering, building real-world AI applications, and developing machine learning models using BigQuery.
- Also completed cloud computing training covering Google Cloud fundamentals, serverless application development, and cloud monitoring practices.

Specific Skills: Machine Learning, Cloud Computing

Self Project | Interactive Blog

June 2025 - December 2025

- Developed interactive web applications using modern web technologies.
- Built and maintained a personal interactive blog for sharing knowledge and insights from books.
- Enhanced web development and technical skills through self-driven projects.
- Demonstrated strong self-learning mindset and readiness for a career in tech.

Specific Skills: Full-Stack Developer

Final Project | Classification of AI Videos Vs Real Videos Using GANs

October 2024 - March 2025

- Developed a video classification system using PyTorch to detect real vs AI-generated videos.
- Implemented a GAN-based architecture combined with a 3D Convolutional Neural Network (3D-CNN).
- Trained the model on thousands of video samples, achieving over 97% accuracy.
- Deployed the model into a simple web application for practical, real-world use.

Specific Skills: Deep Learning, Computer Vision

Bangkit Academy - Dicoding | Machine Learning Cohort

February 2024 - June 2024

- I learned how to create machine learning models in TensorFlow, such as recommendation systems, object detection, natural language processing, and many more.
- The academy also provided me with soft skill courses such as communication, collaboration, project management, expression, and many more.
- My team's final project in this academy was developing a tourist app.
- Built with machine learning implementations such as a recommendation system, it also includes various features such as GPS, payment methods, searching and filtering, and many more.

Specific Skills: Machine Learning, NLP

SKILLS AND LANGUAGES

Hard Skills: Deep Learning (Python, TensorFlow), Data Science (SQL, Tableau, Power BI), Web Development (Laravel, React JS)
Soft Skills: Problem Solving, Critical Thinking, Teamwork, Team Leader
Languages: Indonesian (Native), English (B2), Russian (A2)
Certifications: [Click here to see certifications](#)

HIGHLIGHT PROJECTS

Analyzing Key Factors of Winning in Football Matches and Predicting the Classement of World Cup 2026

Detect Real Video Vs AI Video

Sucker Rod Pump Inferred Prediction

Medium
